

**Product Information**

Organic and Nature™ Organic Stain Remover is a highly effective enzyme-based product specifically designed to clean and biodegrade organic stains on carpeting and fabric as well as remove associated odors. The proprietary organic formula attacks stains on hard to clean carpeting, upholstery, curtains, clothing, rugs, tablecloths, cloth napkins and pet beds. The formula is tough on stains but mild on fabric and carpeting. It removes a wide variety of difficult stains including mud, dirt, food, blood, vomit, urine, feces, pet stains, grass, coffee, tea and wine without the use of harmful petrochemicals, chlorine or phosphates.

The product does not contain any harsh chemicals or odors. The safe non-toxic formula makes it the ideal stain remover for food service applications and child-friendly environments. The non-irritating formula is perfect for treating laundry stains.

**How it Works**

The Carpet & Fabric Stain Remover is a natural cleaner that contains special enzymes that attack stains and odors on contact. The enzymes interact with the stains upon application and continue to safely lift and biodegrade residual traces of these stains. The results are truly amazing!

**Usage Directions**

Shake well before use. Spray on inconspicuous area first to test for color fastness.

For carpeting: Spray Carpet & Fabric Stain Remover directly on affected area. Agitate area with brush or rag and blot with clean white terrycloth towel. After removal of stain, wipe clean with damp cloth. If stain is not completely gone in 48 hours, retreat the stained area.

For odors, pet accidents, vomit, feces or similar stains: Remove stain as indicate above and then pour formula liberally onto stain. Do not blot, allow to dry.

For upholstery and fabric: Spray on affected area, gently agitate area and allow some time for the enzymes to extract the stain.

**Safety Information**

Organic and Nature™ Organic Stain Remover is safe and all natural, therefore it does not pose any threat to humans, animals or the environment. It is generally advisable to keep all household products out of children's reach, and avoid eye contact. If eye contact occurs, flush liberally with clean water.

**Indoor Air Quality and Volatile Organic Compounds**

Recently, attention has been focused on Indoor Air Quality (IAQ) in schools, office building and other indoor areas. Studies indicate that poor IAQ can lead to a variety of adverse health effects including infections, irritations, asthma related reactions, headaches, allergic reactions, heart problems and cancer.

EPA guidelines indicate that one key step for improving IAQ involves prompt removal of stains from carpeting and upholstery. However, chemical-based cleaners actually aggravate the situation by introducing additional toxins into the area. These toxic particles or Volatile Organic Compounds (VOCs) attach themselves to dust particles, carpeting and upholstery and remain in the area for extended periods. Sunlight, heat and other environmental factors interact with VOCs to introduce additional toxic particles having a negative impact on IAQ. Furthermore, these cleaners often leave some residue or remnants of chemicals that can be harmful when coming in contact with skin or food.

Organic and Nature™ Organic Stain Remover is completely natural, non-toxic and does not contain any VOCs. When used as part of a program it is effective in improving Indoor Air Quality and in creating a healthier environment.

**Benefits of Organic and Nature™ Stain Remover**

- Effective formula. Tough on stains but mild on carpet & fabric
- Natural enzymes attack stains particles
- Non-toxic & biodegradable
- Non-hazardous & non-caustic
- Safe around adults, children and pets
- Safe for plants and the environment
- Improves IAQ and reduces allergic reactions and illnesses

**Applications**

- Schools & day-care centers
- Universities
- High traffic carpeted areas
- Health-care facilities
- Laundry
- Hotels
- Food services
- Office buildings
- Restaurants
- Animal facilities

Chemical-Based Cleaners	Organic and Nature Organic Stain Remover
Contains VOCs	VOC free
Introduces toxins to area	Improves Indoor Air Quality
Health risks associated with use	No health risks
Allergic reactions to chemicals	No allergic reactions
Harsh detergents	Mild formula
Harmful to environment	Environmentally friendly
